FOUNDER'S MESSAGE

Having worked through the ranks in the engineering sector, I realized the challenges faced by small firms to acquire a trained workforce. Even in a city like Chandigarh, which produces some of the best minds for several industry sectors, I came across plenty of young graduates struggling to land up a job. It did not take me long to introspect and conceptualize these gaps. I realised that education should be more application-based and less theoretical. And the efficacy of education entirely depends upon the skills we acquire.

With the motto of providing skills and developing a trained workforce, I entered the skill development industry in 2007.

I believe that success follows only those who follow their hearts. At the same time, the environment may not always be compatible with nurturing our passion. Today IPB gives impetus to the overall development of students, giving them a conducive, nurturing environment supported with sufficient exposure.

At IPB, we ensure that our students get the best of indoor and outdoor training, encouraging them to think critically, synthesize knowledge and reflect on their thoughts.

By doing this, we ensure that our students excel in the education system and the real world, allowing our students to "Arise, Awake, and Ascend".

Focusing on application-oriented courses, we train our students as per the requirements of the Banking Industry. I take great pride in informing you that we have successfully made a difference in the lives of 2,450+ youth.
